

Moonglow[®] Magnolia

Moonglow[®] Magnolia (*Magnolia virginiana* 'Jim Wilson') produces creamy-white, lemon scented blooms over an extended period. Its beautiful dark semi-evergreen leaves have whitish undersides. A distinct upright growth habit and hardiness through USDA Zone 5 are additional reasons to try this lovely tree, named for Jim Wilson, the beloved long-time host of PBS Victory Garden.

A Missouri Botanical Garden Plant of Merit, they call it an "excellent specimen tree for residential landscapes." (See MoBot

Plantfinder at <http://www.mobot.org>) Tree experts in the Pacific Northwest agree, naming it a Great Plant Pick for 2009. See www.great-plantpicks.org for details.
