

# Harvest Gold Linden

*Tilia cordata x mongolica* 'Harvest Gold' PP12232

Bright golden yellow leaves make this new Linden selection a standout in the fall. Summer foliage is deep green and glossy. Exfoliating bark is unusual for Lindens, and is handsome throughout the year. Faster growing than *Tilia cordata* cultivars, it reaches a height of about 40 feet and a spread of about 30 feet in 30 years in a typical landscape setting.

High resistance to sun scald and leaf spot, and excellent cold resistance (Zone 3) are among the reasons this fine tree was selected by Dr. Wilbert Ronald and Rick Durand of Jeffries Nurseries, Ltd., of Manitoba.
