

Robust Wisteria cultivars promise glorious blooms

Our Wisteria product line offers a full spectrum of bloom colors. The #5 White Flowering Wisteria pictured is representative of the dense foliage and well-developed branching on these sturdy vines that are supported with a bamboo stake.

White Flowering Wisteria
(*Wisteria floribunda* 'Longissima alba') sports long chains of fragrant, pure white flowers before the leaves appear.

Blue Moon Wisteria
(*Wisteria macrostachya* 'Blue Moon') is striking for its 12-inch racemes of fragrant blue flowers that appear among the leaves in several flushes from June to September. A North American native vine selected in Minnesota for its prolific blooms and extreme hardiness, it is rated hardy through USDA Zone 4.
