Adams Crabapple
Deep pink buds open to single pink blooms. This reliable performer has symmetrical form.

Adirondack Crabapple
Adirondack is an important cultivar because of its form and outstanding flower display. It is a compact, dense tree with strongly upright form. It produces one of the heaviest flower displays of the crabapples. A Don Egolf, U.S. National Arboretum introduction.

Cardinal Crabapple
Foliage holds its rich color through the summer and has the best disease resistance of crabs with deep purple leaf color. Flowers of this Malus hupehensis hybrid are bright magenta-pink to red.

Coralburst® Crabapple
Top grafted on a 4’ standard, Coralburst® is slow growing and forms a very dense, symmetrically rounded head.

Dolgo Crabapple
One of the hardiest and earliest of the crabapples to bloom, pink buds of Dolgo open to large, fragrant white flowers. Abundant fruits ripening in mid-summer are edible and excellent for jelly.

Donald Wyman Crabapple
Glossy clean foliage gives the tree a fresh appearance all summer. Small bright red fruit is among the most persistent of all crabapples.

</table>

This compact selection of M. sargentii features long lasting, high quality fruit. Annual fruit display is more persistent than any other natural dwarf crabapple.

Fine textured, deeply cut foliage gives this unusual crab a delicate appearance. The form is elegant, with slender limbs spreading horizontally from upright branches. The abundant golden yellow fruit is truly tiny.

One of the best yellow fruited crabs, it features neat, crisp, dark green foliage and an upright branch habit.

Deep pink buds open to white flowers on this densely upright, narrow crabapple. Dark green leaves stay clean and disease free throughout the growing season. Bright cherry red fruits contrast well with the dark green foliage and persist into late autumn, when a touch of yellow fall color adds seasonal interest. Part of the Spear™ family of trees.

A compact dwarf tree, perfect for formal gardens, patios and courtyards. Fine textured small leaves and dense growth habit create a very symmetrical, globe shaped head. It presents a neat and formal appearance throughout the year.

| **Malus ‘Profusion’** | **Malus ‘Profusion Crabapple**
A popular variety with deep pinkish red flowers and maroon fruit. | 20' 20' 4 | Upright, spreading | Purplish when young, maturing to bronze | Deep pink, single | Maroon, 1/2", persistent | Fair | Good | Excel | Good |
| **Malus ‘Purple Prince’** | **Purple Prince Crabapple**
An outstanding rosy bloom crab. The purple bronze foliage and bright flowers rival Liset, but Purple Prince does not suffer from stem splitting and is faster growing. This is probably the best purple foliaged crab for growers. | 20' 20' 4 | Rounded | Purple, becoming bronze green | Rose red | Maroon, 3/8"-1/2" | Excel | Good | Excel | Good |
| **Malus ‘Radiant’** | **Radiant Crabapple**
A hardy University of Minnesota introduction, this tree resists fireblight and performs well in the Rocky Mountain and intermountain states. | 25' 20' 3 | Broad, rounded crown | Red-purple when young, maturing to green | Deep red buds, single deep pink flowers | Bright red, 1/2" | Poor | Excel | Good | Fair |
| **Malus ‘JFS KW213MX’ PP 31008** | **Raspberry Spear® Crabapple**
Deep pink buds open to bright magenta flowers on this columnar crabapple. Clean and disease-free summer foliage holds its dark purple color, bronzing on the older leaves in late summer and early fall, when orange tints appear. Purple-red fruits ripen to deep bright red and persist into late autumn or early winter. Part of the Spear™ family of trees | 20' 8' 4 | Narrow upright column | Purple | Magenta pink | Maroon to deep red, 1/2", persistent | Excel | Excel | Excel | Excel |
| **Malus ‘Red Barron’** | **Red Barron Crabapple**
Ascending branch structure, narrow form and adaptability to urban conditions have earned Red Barron a place on our UtiliTrees™ list. | 18' 8' 4 | Narrow, columnar | Reddish-purple, maturing to bronze-green | Dark red, single | Dark red, 1/2" | Fair | Good | Excel | Excel |
| **Malus ‘Red Jade’** | **Red Jade Crabapple**
Desirable for its graceful form, white flowers, and its abundant cherry red fruit. Like many of the weepers, it looks its best when grown as a solitary specimen. | 10' 15' 3 | Long, graceful, slender weeping branches | Glossy vibrant green | Deep pink buds, white flowers | Bright glossy red, 1/2", abundant, persistent | Fair | Fair | Excel | Fair |

Fragrant white flowers smother Sugar Tyme® in spring. Persistent red fruits provide a fine fall and winter display.

Very popular, widely used and time tested, this is a standard for comparison for white flowered crabs. Don’t confuse *M. zumi* ‘Calocarpa’ with straight *M. zumi.*
