

Taxodium distichum

Bald Cypress

Height: 55' | **Spread:** 30'

Zone: 5

Shape: Pyramidal

Foliage: Medium green, deciduous conifer

Fall Color: Rusty orange

Native to wetlands of the South, bald cypress is also surprisingly tolerant of dry soils and is hardy enough to survive in parts of southern Canada. A deciduous conifer, it has done well in urban street plantings. Fine textured needle-like foliage casts filtered shade in summer before turning rusty orange and falling to make way for the warming rays of winter sunlight.

Trees are the Answer!
