

Cornelian Cherry

Cornus mas

Zone: 5
Height: 18'
Spread: 22'
Shape: Low branched, rounded
Foliage: Glossy dark green
Fall Color: Slight to reddish purple
Flower: Small, yellow, in masses
Fruit: Bright red, cherry like

In form and fruit, this tree could be mistaken for a crabapple. Its exfoliating bark and masses of bright yellow flowers that appear very early in the spring make it unique.
